Railway Operators

Design a train station!

Complete a design of your very own train station for a chance to win a **£200 amazon gift voucher!**

Follow the simple design brief and let your imagination do the rest of the work to create a functional and innovative Train station.

Design brief:

1. Your station needs to include platforms and possibly shelters or waiting rooms which should be accessible to everyone using the station.
2. Your station needs to have a way of purchasing tickets, like a ticket office and/or a ticket machine.
3. Your station is placed in a busy city centre location so there should be things that people might need or like, like toilets, food and drink.
4. Consider how people with limited mobility can access all areas of the station.
5. Think about how your station will be kept clean and tidy.
6. Consider how you can design the station so that it is safe for people to use and that any emergencies can be dealt with as effectively as possible.

Creative brief:

Include anything we haven't thought of yet!

E.g. How could the station be made more sustainable?
e.g. in its use of water or power, or how can it encourage people to not bring their cars?

E.g. How could the architecture of your building be both visually pleasing and useful?
